MERAXIS

1 General information

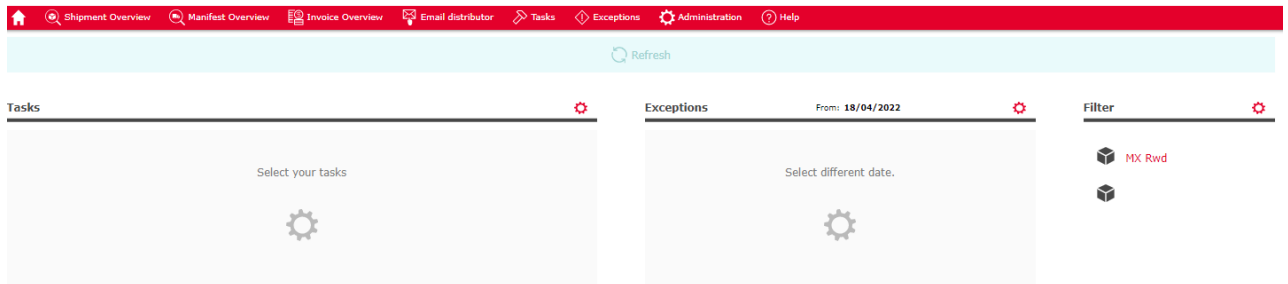

- > The Meraxis AX4 – Portal provides visibility on transport orders due to an integrated solution with Meraxis ERP and the connected forwarders.
- > Transports orders and milestones are available by the AX4 portal and / or connection through EDI.
- > The data is processed on a „near-real-time“ base for Meraxis and its forwarders.
- > Link to AX4: <https://www.ax4.com/ax4/index.jsp>

2 Shippeo

- > Meraxis offers an addition to the service of AX4 with Shippeo.
- > Shippeo is a solution to link shipments shown on AX4 to either TMS or telematics.
- > Information regarding shipments can be exchanged in real time with Shippeo.
- > Shippeo will set events and report exceptions automatically if link to TMS or telematics is successful.
- > You can choose whether you want to set the defined milestones manually in AX4 or be connected with Shippeo telematics or TMS. In any case, AX4 will be the working platform.

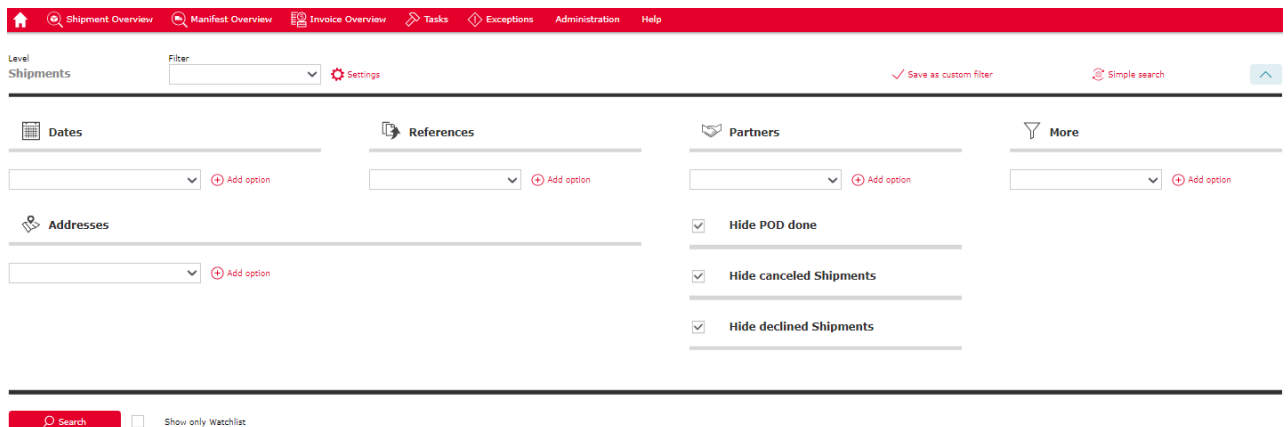

3 Landing page

- > **Shipment Overview** Overview of all shipments workplace for all tasks within the forwarder process.
- > **Exceptions** Overview of reported exceptions by forwarder.
- > **Administration** Management of personal data.
Master User: set up of new users (separate manual *Meraxis DIGI SCM AX4 - Forwarder User Setup*).
- > **Filter** Overview of customized filters.

4 Shipment Overview

- > Shipment overview presents all orders.
- > Individual filters can be set for each search or saved as a customized filter layout, which can be selected whenever required.

MERAXIS

- > Filters to hide cancelled orders from Meraxis, declined orders from forwarders and orders for which the POD done milestone has been reached, are set automatically but can be removed.

- Hide POD done
- Hide canceled Shipments
- Hide declined Shipments

- > Click on the Search button in order to see all open orders:

Explanation

Save

- > Forwarders can report an exception for the shipment if planned loading and delivery date are effected due to an issue.
- > Choose status suited for shipment.
- > Status shows to which milestone exception belongs.

MERAXIS

- > Choose reason best suited for shipment.

A dropdown menu titled "Reason*" with a downward arrow. The menu is open, showing a list of options: "Please choose", "Acceptance refused", "Weather conditions / Force Majeur", "Traffic jam", "Increased Waiting Time", "Damaged Vehicle", and "Carrier related - Lack of driving time".

- > Explanation can be filled out with further info (not mandatory).
- > Please call Meraxis by phone in case there is an urgent and important info that Meraxis needs to know about immediately.
- > Exceptions due to delays are calculated automatically and shown on AX4 if Shippeo is connected (ETA Events).
- > Exceptions can be reported manually even if you are connected to Shippeo. These events replace the automatic ones in any case.

7 Shipment details

- > Shipment details can be used as an overview on the shipment or to change forwarder reference, Truck and Trailer ID.
- > Truck and Trailer ID must be updated immediately in case truck or trailer changes during shipping (especially important if shipment is connected to Shippeo).

A form with three input fields and a "Save" button. The fields are labeled "Forwarder Reference:", "Truck ID:", and "Trailer / Container ID:". The "Save" button is red and located below the fields.
